

Second Trial Synthesis Report

This report combines the RGB emergence and green-cover workflow with the multispectral NDVI and NDRE workflow. The overall score is a descriptive ranking based on normalised image-derived indicators. It should not be interpreted as a formal statistical test.

Observed Leaders

Highest ranked tray: Tray 8 - Microbes | Inside (score 85.41).
Highest ranked treatment x environment group: Microbes | Inside (mean score 81.21).
